

LYSE SPORT LED 600 & 1200W

SOLLJUS LYSE SPORT 600 & 1250W

Solljus Lyse Sport is developed to meet the high requirements within outdoor sports arenas. With Lyse Sport we can illuminate everything up to UEFA class A installations to a very competitive price. The luminaire is available with both Dali and DMX lighting control and a specific laser sight that is mounted onto the luminaire, making the installation very easy!

QUALITIES

FRAMEWORK

The luminaire is available with three different optics to be able to produce an even light even in the largest arenas. The built-in Inventronics driver and Lumiled led chip are cooled by a solid modular design. It is possible to mount the driver up to 70m from the luminaire. The construction is IP66 rated and is protected against corrosion with a special polyester powder.

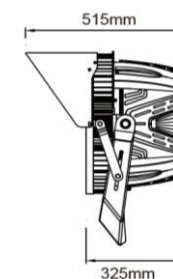

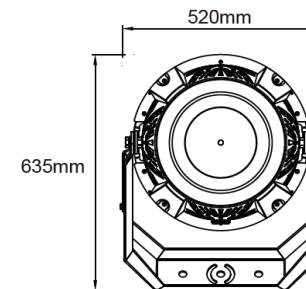

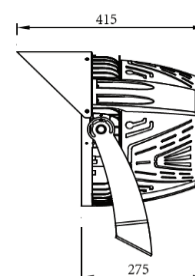

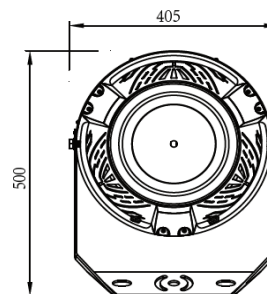

LIGHTING CONTROL

Depending on the size and the use of the arenas, there are different requirements for how the lighting is to be controlled. Lyse sport has both DMX and Dali as options to be able to meet all the requirements.

TECHNICAL DATA

LYSE SPORT	600W	1250W
Light efficiency	150 lm/W	130 lm/W
Lumen (output)	90 000 lm	162 500 lm
Color temperature	3000K / 4000K / 5000K / 5700K / 6500K	
Color Rendering Index	CRI 70+ or CRI 80+	
Avarage rated LED life	L70 50 000 h +	
Light source	Lumiled	
Driver	Inventronic	
Working temperature	+50°C to -20°C	
Lighting control	Optional Dali and DMX	
Protection class	IP 66	
Optics	14°, 40° and 60°	
Net weight	17 kg	19,5 kg
